

Botox Winnipeg

Botox Winnipeg - By definition, a wrinkle is a crease, fold or ridge in the skin. Skin wrinkles normally appear as a result of the processes of aging, comprising: glycation or likewise from the prolonged immersion of the skin in water. Skin wrinkling is a result of aging, sun damage, smoking, habitual facial expressions, poor hydration and different other elements. Skin wrinkles in the water caused by lengthened water exposure which causes the outer layer of skin to absorb water. Depletion of water in the body as with dehydration also can lead to the puckering of the skin. Cortisol is another factor which causes degradation of skin collagen.

To be able to treat wrinkles and other skin depressions, dermal fillers are usually used. There are products that are injectable into the soft tissues. Dermal fillers are designed to enable injection into the skin for purposes of improving the appearance of the skin. The most popular products are based on hyaluronic acid.

Botulinum Toxin

The Botulinum toxin is a neurotoxin protein which is made by the bacterium *Clostridium botulinum*. A popular kind of botulinum toxin is referred to as "Botox," or onabotulinumtoxinA. This particular kind of botulinum toxin is made by Allergan Inc. for both therapeutic and cosmetic usage. Botox is made use of in the treatment of migraine headache and cervical dystonia or spasmodic torticollis that is a neuromuscular disorder which involves the neck and head. Botox has lots of uses along with its cosmetic application.

In the year 2009, Americans now had a new available kind of botulinum toxin. This new form, made by Ipsen, is referred to as abotulinumtoxinA or Dysport. It has been given FDA approval and is presently used to treat cervical dystonia as well as glabellar lines in grown-ups. Dysport and Botox however, are not the same because the two drugs have different molecular structure.

The Botulinum toxin efficiently remedies wrinkles by relaxing the muscles that result in wrinkles. It is indicated for the remedy of glabellar lines, those which occur between the eyebrows in grown-ups and is not suitable for the remedy of all wrinkles. Whatever other usage of this particular toxin is considered "off-label" use and is not approved by the FDA.
